## DETAILED ACTION

### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Wendi Weinstein on 09/21/2010.

The application has been amended as follows:

**Previously withdrawn claim 18 has now been rejoined.**

### REASONS FOR ALLOWANCE

2. Claims 1-7 and 9-19 are allowed over the prior art of record as amended by the applicant on 09/10/2010 and as amended above.

3. The following is an examiner's statement of reasons for allowance: The claims in this application have been allowed because the prior art of record fails to disclose or render obvious the structure and method as recited in independent claims 1, 12, and 15.

4. The closest prior art of record is Eggers et al. (USPN 6,106,524); Haim et al. (USPN 6,309,370); and Shapland et al. (WO 9904851 A1).

5. Regarding independent claims 1, 12, and 15, the closest prior art of record fails to teach among all the limitations or render obvious a structure and method comprising a method of injecting a therapeutic composition by use of a catheter to be

Art Unit: 3763

percutaneously inserted into a living body lumen, said catheter comprising a sheath portion having a lumen extending therein, an insertion member slidably disposed in said lumen of said sheath portion and having a distal end portion capable of protruding from a distal end portion of said sheath portion, an injection needle disposed at said distal end portion of said insertion member for injecting said therapeutic composition into a target tissue, and a first electrode, separate and distinct from both said insertion member and said injection needle, said first electrode being fixedly secured to an external surface of said distal end portion of said insertion member and spaced a predetermined distance from a bevel of said injection needle for measuring a cardiac action potential, said method comprising the steps of: inserting said catheter into a living body and advancing said catheter to the vicinity of said target tissue; and puncturing said target tissue by said injection needle and injecting said therapeutic composition into said target tissue through said injection needle, based on said cardiac action potential measured by said first electrode spaced the predetermined distance from a bevel of said injection needle.

### ***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JASON FLICK whose telephone number is (571)270-7024. The examiner can normally be reached on Monday through Thursday, 7:00am to 5:30pm EST.
